SURENDHAR S

Tirupathur, Tamil Nadu | 9344885146 | s.surendharsure2004@gmail.com | linkedin.com/in/surendhar-s-765b132bb

CAREER OBJECTIVE

Entry-level cybersecurity Professional seeking an opportunity to apply knowledge of network traffic analysis, vulnerability assessment, and threat detection using tools such as Wireshark, Nmap, Burp Suite, Metasploit, Kali Linux, and Splunk**.** Familiar with AWS services including CloudWatch, CloudTrail, IAM, S3, and EC2**,** along with security monitoring, log analysis, and incident investigation**.** Interested in building strong network and cloud security skills while helping organizations protect systems and data from cyber threats.

EDUCATION

B.Tech in Information Technology Present
P.S.V College of Engineering and Technology - 82%
Higher Secondary School 2022
Dominic Savio - 70%

CERTIFICATIONS

1. AWS Cloud Security & Risk Management -Whizlabs
2. Pre Security Learning Path -TryHackMe
3. Junior Cybersecurity Analyst -Hackthebox
4. CyberSecurity for Students -Let's Defend
5. ISO/IEC 27001 Lead Implementer -Udemy
6. ISO/IEC 27001 Lead auditor -Udemy
7. Network Fundementals -Cisco Networking Academy
8. Junior Cybersecurity Analyst Career Path -Cisco Networking Academy

PROJECTS

1. **AWS Cloud Security Monitoring & Threat Detection** **Nov,2025**
   - Configured AWS CloudTrail and CloudWatch to capture API activity and monitor events across cloud resources. Analyzed AWS GuardDuty findings to identify potential threats and suspicious behavior.
   - Performed cloud log monitoring and security analysis to detect anomalies in a simulated AWS environment. Strengthened understanding of cloud security monitoring, threat detection, and AWS security best practices and IAM access control concepts.
2. **Cryptographically Protected Model-as-a-Service with Zero-Exposure Inference** **In-Process**
   - Built a privacy-preserving AI system using homomorphic encryption to perform secure machine learning inference on encrypted data.
   - Developed the prototype, ensuring sensitive data remains encrypted during processing. Demonstrated how cryptographic techniques can enable secure AI services without exposing user data or model information**.**

SKILLS

1. **Cloud Security (AWS):** IAM, EC2, S3, VPC Security Groups, CloudTrail, CloudWatch.
2. **Security Tools:** AWS GuardDuty, Splunk (SIEM – Basic), Wireshark, Nmap, Burp Suite, AWS CloudTrail, AWS CloudWatch, Network Firewall Fundementals.
3. **Networking & Systems:** TCP/IP, DNS, HTTP/HTTPS, Network Packet Analysis, Linux Security Basics.
4. **Security Operations & Threat Analysis:** Alert Triage, Incident Investigation, IOC Analysis, True/False Positive Classification, Log Analysis, Threat Detection, MITRE ATT&CK Framework Awareness.
